Dear NEWDOS/80 Owner:

We have received your NEWDOS/80 Version 2.0 registration. This will enable us to forward any ZAPS or other information to you that may be necessary in the future to support your purchase.

Enclosed are the ZAPS that were not available at the time your manual was printed, but which may already be included on your diskette. This may be determined by comparing the date of the ZAP to the date of your Master Diskette. If the Master Diskette date is equal to or greater than the ZAP date, the ZAP is included on your operating system.

We hope that the NEWDOS/80 operating system will fill your needs. Should you encounter difficulties in operating it we would encourage you to write us at the above address and report the problem. This, we feel, helps us to better serve you, our valued customer.

Sincerely,

A handwritten signature in cursive script that reads "Ron BeDillon".

Ron BeDillon
