Note: This disk boots up on a Model I, III, or 4 (in III mode). It transfers the file(s) to TRSDOS 2.3 or TRSDOS 1.3. If you are using LDOS, DOSPLUS, or other compatible DOS, just do a DIR and then COPY the file(s) over to a diskette formatted by your DOS. For NEWDOS80, first generate a TRSDOS disk, then use normal methods employed by NEWDOS for converting files from TRSDOS disks.
