GOING OUT FOR BUSINESS SALE

Dear PowerSoft Customer,

Happy New Year to you. We hope you had a safe and happy holiday season. We also thank you for your patronage over the past nine years. As PowerSoft enters its 10th year of business, it looks like this will be our last - at least in our present form as a TRS-80 software house. This could also be the last mailer that we do for TRS-80 software. We are in negotiations at this time to possibly license our software to another company and this means that the prices will most likely be increased by the new company and certain policies could change and products dropped. If we don't license the software, then we will still have to raise prices in 1989 to warrant the much smaller volume sold. To reprint documentation in small quantities is obviously more expensive than the larger volume we used to print in.

In this mailer, we are going to be offering some unbelievable **ONE TIME ONLY** prices that will never be offered again. This is a **limited time only sale**, and these prices expire on **March 15, 1989**. We encourage you to look through this mailer and select some TRS-80 items from it. This is the very best time to buy TRS-80 software that there has ever been. If this sale is successful, then we will be encouraged to continue the TRS-80 line of software for the rest of the year. In the meantime, order anything that you might need, because the price will never be better.

Support is not included in the price. These products have been on the market for many years and have been tested and debugged long ago. The manuals have been revised over the years as well. All programs work as advertised. There is no expressed warranty, except that the disks are loadable when you receive them. If you need extra help or support, this can be arranged outside the price of the software.

If you are a **SUPER UTILITY** owner, this might be a good time to get extra disks, manuals or even the unprotected **CMD** file version of **SUPER UTILITY**. If you own an Epson or compatible type printer, we have lots of programs for the Epson, so look at those.

We need to raise some cash to continue this side of our operation, as it has not paid for itself in several months. If you have some friends who have a TRS-80, let them know about this sale. Now is the time to buy! The TRS-80 is a great computer, and it gets better with better software.

This is not a "going out of business sale". It means that we are going out **FOR** business. We need to know if there are still people out there who even want these items. From our experience in the past six months, it seems that there are not too many left. Let us know with your orders.

These products are still protected by U.S. and International Copyright Law and may not be given away to friends. We are very hurt that so many bootleg copies of our programs have been distributed this past year. We get calls from people who have never bought a program from us asking for help on something they got from a friend. And then they get indignant when we explain that they didn't buy the program. One lady even said that since she got the copy at the computer club, it was official and we should help her! She even started yelling at us! I know this is a problem for every software house, but in a declining (disappearing) market like the TRS-80, it is a disaster. We are happy to help anybody, but we will have to charge for our services like any other company. If you've been using a bootleg copy of one of our programs, perhaps now is the time to purchase it and make things "right". We sure would appreciate it.

If this sale is successful, we will send out another newsletter in a few months telling you what we are going to do. You may order by mail or on our 24 hour order line. If you have any questions about any of these products, or if they will help you, please call or write. Visa or MasterCard are gladly accepted, as well as checks or money orders. Now, please look these sheets over and send us an order! - *Thanks again.*

PowerSoft Utilities for TRS-80 Hard Disks and/or floppies:

NEW POLICY: You may buy the manual to any PowerSoft program for only \$10 (plus \$2 shipping). If you decide to purchase the program, we will allow the full \$10 credit against the purchase price.

SUPER UTILITY PLUS • The greatest utility ever written for the TRS-80. Every TRS-80 magazine said so! "The King of Utilities" - Reads, repairs, and works with all popular TRS-80 operating systems Models I, III, 4. 5 Star Reviews in *80-MICRO*, *80-US*, *INFOWORLD*, *POPULAR ELECTRONICS*, *FAMILY COMPUTING*, *CREATIVE COMPUTING*

If you use a TRS-80 with disk drives, then this is a must-have program that you will wonder how you did without for so long! Super Utility has won numerous awards, has received many 5-Star reviews and this could be your last chance to purchase a copy at an unheard of price. Super Utility does so many things, you will never use its full potential, but it isn't that hard to use since it is completely menu-driven with the most common defaults built right in. It is configurable for all the popular TRS-80 operating systems and will even allow you to set one drive for one system and another drive for a different operating system and copy files easily between the two. Even between Model I and III or 4, regardless of density, track number, number of sides, or system used. We have thousands of letters in our files over the years about how Super Utility has saved the user from various problems. Removes passwords, fixes disks, reformats a disk without erasing the data, etc. This was the very best utility ever written for the TRS-80 and now is the time to get your own copy. Super Utility has over 65 functions and features. A fantastic buy. Does not work on hard disks. See ToolBox or ToolBelt for similar features for hard drive use. Does not support Newdos/80 double-sided.

Super Utility + Mod III & I - Disk repair plus 65 other great functions with full manual.

Super Utility + 4 (same as above for TRS-80 Model 4, 4P, 4D - Reads/Writes 4, III & I.)

> Original 1986 price: \$79.95

The Model 4 version of Super Utility has all the features of the Model I/III version, but more! It uses the larger amount of memory for quicker operations, plus uses the three function keys. One key is even defineable by the user to go right to their favorite or most used function in Super Utility 4. Also, boots right up in a Model 4P without having to first load the Model I/III rom file. Many other niceties for the 4 have been implemented in this version of Super Utility.

Super Utility Plus Model I/III 3.2 Technical Manual

**Wow!!
\$34.95
\$34.95**

\$ 5.00

Contains all system calls and technical information for machine language fans. Not required for use of SU+.

Extra Super Utility Manuals, disks or unprotected disks:

Need an extra manual for SUPER UTILITY? Pick up an extra manual (3-hole punched) for only \$10. Need an extra disk? Send us your serial number (if registered) and you can get an extra disk for only \$10. Want the unprotected version? Send us \$20 and your serial number (if registered) and we'll send you the CMD file version.

LDOS ToolBox (Hard Disk Check, Repair, Modify, much more! Like SU+ for hard disk)

\$24.95

> Original 1986 price: \$49.95

If you own a hard disk and use LDOS, this is the perfect insurance policy for your data. The LDOS TOOLBOX is like a Super Utility for hard disks. Features Disk Check and Disk Repair, Sector Modification, plus many other useful utilities that makes using a hard drive even easier. Each program contains built-in help, so many times you don't even need to look things up in the manual. A very wise buy for hard disk users.

Model 4 ToolBelt (same for Model 4 TRSDOS 6 use. OK for 6.3. Like SU+ for hard disk)

\$24.95

> Original 1986 price: \$49.95

This is similar to The LDOS TOOLBOX, except it is for the Model 4 TRSDOS 6 operating system.

BOTH LDOS TOOL BOX AND MODEL 4 TOOLBELT FOR ONLY \$44.95!

Back/Rest - Super Fast Hard Disk Backup and Restore. Saves hours of time! For I, III or 4.

\$34.95

> Original 1986 price: \$99.95

Initially written for ourselves, BACK/REST has proven to be a great time saver for thousands of TRS-80 hard drive users. When reviewed by 80-MICRO, they gave it FIVE STARS. It saves hours of time and is easy to use. BACK/REST can back up 10 megabytes in approximately 18 minutes! It also tells you how many disks to have ready. It works under LDOS or TRSDOS 6 (both versions on same disk). A great utility for hard disk users!

Superior Hard Disk Drivers for Tandy disk systems. Mix Model III and 4.

\$39.95

> Original 1986 price: \$99.95

Our hard disk drivers are considered the best in the industry. Out-performs the Tandy drivers in many ways. Our drivers allow you to combine LDOS and TRSDOS 6 on the same drive and boot from either system. They run the drive slightly faster and take much less memory from the system. These are only for the Tandy 5 or 15 meg drives.

PowerMail Plus (Please specify Model 4, III /I.) 5 Star mailing list-data system!

\$34.95

> Original 1986 price: \$99.95

This program was also written for ourselves when all the other mailing list/data base systems couldn't keep track of the type of data we wanted to keep track of. It was top-rated in several publications and has never been topped. Works on floppies or hard disk under all popular TRS-80 operating systems. Allows importing of data from several other once popular mailing systems. Written in machine language by the author of Super Utility, this program is FAST and sorts up to 10 levels very quickly. If you keep track of names and addresses for any situation, this is the one to use.

Text-Merge Form Letter Module for customized "form letters" for PowerMAIL! \$15.00

> Original 1986 price: \$29.95

This optional module for PowerMail allows you to create customized "form letters" or custom labels, lists, etc. with PowerMail Plus and any word processor that saves in ASCII text. Very easy to use and really gets the effect you want.

PowerSCRIPT - A Major Enhancement for SCRIPSIT 4, III and I (not SuperScripts) \$22.95

> Original 1986 price: \$39.95

One of our very best sellers, this modification for Radio Shack's SCRIPSIT program turns it into a POWERHOUSE! Our program merges with your copy of SCRIPSIT to create a new program that outperforms most other TRS-80 word processors without relearning a new program! PowerScript adds new features in two important areas. The first area is in the printer control. PowerScript allows you to add printer control codes directly in the body of your text! Now it is easy to add underlining, bold face, and the different sizes of print. Initially set up for the EPSON type dot-matrix printers, it is configureable to just about any printer during set-up. If you have more than one printer type, then just set up a copy of PowerScript for each printer type. The second area of improvement is in disk and file control. PowerScript adds several neat features to SCRIPSIT, including the ability to see the directory without exiting the program (alphabetized too), seeing how much free space you have, and others. This has been one of our most popular programs and we have received many, many complimentary letters on its performance. It works on the Model I, III or 4 versions of SCRIPSIT. It will even make a Model I version of SCRIPSIT work on a Model III or 4 (in the III mode). Lastly, PowerScript removes the limited copy "feature" of SCRIPSIT so that you may make as many copies as you need or copy it to your hard disk without hassle.

PowerDraw (animated TRS-80 screen graphics! Easy to use. Great for kids or adults!) \$19.95

> Original 1986 price: \$39.95

INFOWORLD, 80-MICRO and 80-US magazines really loved this program when they reviewed it. It does many things and is fun to use as well. First, PowerDRAW allows you to create graphics (may be mixed with text) and save them to disk. It also allows you to create up to 33 frames of animation and "play" them like a movie. It also allows you to save the graphics in several modes, including BASIC listings, CMD file format, and others. These can then be merged into your own programs, etc., either in BASIC or machine language. Many of PowerSoft's opening screens were created with PowerDraw. In fact, it even creates animated opening screens (like Super Utility, PowerTool, etc.) to really pep up the program. It also allows you to print the screens on EPSON type printers in various sizes or densities.

PowerDOT 2.0 for printers. Mix text with graphics - no problem. Build new fonts. \$19.95

> Original 1986 price: \$49.95

This program is similar to PowerDraw, but quite different. It also allows you to create screen graphics combined with text, but it allows you to create drawings much larger than your screen. The screen is a "window" to a much larger drawing area and you use the arrow keys to move about the drawing. In a way, it is similar to Macpaint for the Macintosh computer. It also allows you to create custom fonts for ads, etc. Many of our early ads were created with PowerDot. Please specify if you use EPSON, Okidata, ProWriter, or Radio Shack printers. There are different versions.

PowerDriver Plus for SuperSCRIPSIT and SCRIPSIT PRO and Epson printers \$17.95

Allows EPSON or compatible printers to be fully utilized with SuperScripts.

This is a replacement driver for the ones you got with SuperScripts. It fully supports the various Epson and Epson compatible printers to the limits of their capabilities. Model I, III or 4 is supported in the same package. Easy to install. Once installed, it is there for you without any extra thinking or manipulating. Thousands of happy customers!

TRS-80 GAME COLLECTIONS ON DISK - for Mod I, III, 4 (In III mode) - Special! All 3 Sets for \$24.95

Leo Christopherson TRS-80 Game Disk with full sound (Leo's Greatest Hits)

This is one of the greatest values in games ever produced. Leo Christopherson wrote the very first animated game for the TRS-80 and the country went wild for it, Android Nim. To watch these creatures will make everyone laugh as they shake their heads up and down or side to side and blink at you stupidly as it waits for you to make a move. Then he invented how to make the TRS-80 produce sound and added it to NIM. He then followed Android Nim with the other games, even getting Radio Shack to sell Dancing Demons, which is a real scream. It alone is well worth the price of this disk, but you get ALL of Leo's programs on one disk for one great low price. If you haven't yet bought this disk, do it now! Each one of these games originally sold for \$9.95 - \$19.95 EACH. The disk includes the famous games: ANDROID NIM, BEEWARY, DUELING DROIDS, DANCING DEMONS (once sold by Radio Shack for \$14.95), SNAKE EGGS and ANIMATED LIFE. All games feature full sound effects and some of them are even in 3-part harmony! You and your kids will just love this disk! Dancing Demon even features saving song and dance routines to disk and four are included! The possibilities are endless and it is always entertaining. A great way to "show off" what your computer can do.

KIM WATT GAME DISK - Space Colony, Symon, Capture, Horse Race Slots - 3 with Sound \$ 7.95

Kim Watt, author of Super Utility and other famous programs wrote some games that Adventure International published back in the early 70's. They are interesting in that most people have never seen these, as by the time SUPER UTILITY was established in the market, these games, as well as Adventure, were gone. Originally these were sold on three separate diskettes (or tapes), but we have combined them all on one disk for you collectors.

LANCE MICKLUS' GREATEST GAMES - 3 Disk Set! \$17.95

This is a great collection, as it features space games, adventure games, gambling games (The Mean Crap Machine Game also includes a Craps tutorial booklet), board games (Mean Checker Machine), as well as some darn useful programs that you might use for real purposes. Also has some educational games for the kids. You will enjoy owning this set of programs by one of the early pioneer programmers for the TRS-80, Lance Micklus. The manual is on the disk.

Special! All 3 Game Disk Sets for only \$24.95! Five disks crammed full of games that you and your family will really enjoy!
If ordering the single density, Model I version of game set, the price is \$29.95.

Clearance Items - many are "one of a kind".

Order now, in case of limited quantities. Some items are one of a kind, and some have a limited supply of documentation.

**This is the very best time to pick up some bargains!
We need your business and look forward to serving you.**

Don't forget the 5 Disk Game Special for only \$24.95!
(If ordering the Model I version, the set is \$29.95.)

Thank you. We appreciate your business.

TERMS & CONDITIONS OF SALE:

No dealer discounts off these prices.

All software is either new, or like-new and is checked before we ship to make sure it loads. All software sold AS-IS with no returns, exchanges or guarantees. There are no warranties offered as to usefulness or purpose for any particular application. That is up to the individual buyer. All software is supplied on disk, unless cassette is specified. All software contains original documentation, packaging and master diskette(s). These are all original packages - no copies. If there is something you want, NOW is the time to act, because some of these programs may never be available to you again with full manuals, real master disks, etc. Don't delay, though, because there is only one of each type here on most items, and they may go fast! Order today before you forget. Better yet, call us day or night and leave your order on our answering machine. This may make the difference between getting what you want and us being out of it by the time your order arrives in the mail.

We accept Visa, MasterCard, COD or check/money order. If you pay by check or money order, and we are out of an item you ordered, you will be refunded for the unshipped balance. Please add \$3 shipping for the first item, with \$1.00 added for each additional item (software). Texas residents must add 8% sales tax. COD will add an additional \$4 to total.

Note to Model 4 users: 4(III) means software will run in Mod III mode of Model 4. Model III programs will not run under TRSDOS 6.x. To BOOT Model III protected games or disks on a Model 4P, boot or load the MODEL4/III rom disk that came with your 4/P and then boot the game.

If you need a Model III TRSDOS 1.3 System Diskette, please add \$5 to your order. This (or any other Model III DOS) is required to run Model III programs on a Model 4, 4P or 4D. We have a license from Tandy to supply this in conjunction with a software sale, not as a stand-alone product.
