Save Time and Effort. Whether you're in business, education or government, our TRS-80 Model 4 computers make quick and easy work of routing chores

such as word processing, spreadsheet analysis, data base management and personal applications. And that allows you more time for decision-making.

No Programming Required. We offer a huge library of software you can put right to work. And you can add the optional CP/M Plus operating system to use thousands of additional ready-to-run programs.

More Features Per Dollar. With other computers, you have to pay extra for features that are standard on our Model 4 computers. There's an electric typewriter-quality keyboard. A 30.5cm high-resolution monitor (22.9cm on the 4P) that

displays 80 characters by 24 lines. A built-in parallel printer interface. An RS-232C interface for communications with other computers*. Two built-in floppy disk drives. In addition, the 64K memory can be increased to 128K.

*(Model 4P only)

Take Your Office with You. The

Model 4P is a powerful tool that makes you more productive. This 11.8kg transportable works anywhere there's AC power. And since the 4P shares files directly with Model 4, you can transfer the data you need and continue your work

outside the office.

Increase Office Productivity. The TRS-80 Model 4 desktop computer can help you immediately, plus it's a system that grows with you. It's easy for you to expand with options like a 15 meg. hard

disk and communications software to share data with other computers, or to access national information services.

See Them Today. The TRS-80 Model 4 and Model 4P are available at Tandy locations nationwide. Be sure to ask about our "off-the-shelf" software and our training and service plans, too.

DISK SOFTWARE FOR MODEL 4

Three New Popular Programs that Take Advantage of Model 4's Superior Features—Large Internal Memory, 8 x 24 Display Screen and Improved Clock Speed

NEW! SCRIPSIT®. An easy-to-use, low cost word processing program for Model 4. Prepare correction-free memos, letters, reports and manuscripts. Displays a full screen of text in an 80-character by 24-line format. Includes all the standard features that have made SCRIPSIT an outstanding word processing program for years. There's a "global search" mode to find phrases or sentences that you want to alter or delete, plus reformatting, hyphenation, centering, headers, footers, justification, margin and tab settings, automatic page numbering and more. With training manual, audio cassette course, and quick reference card. Requires printer. 26-1596 149.95

NEW! PFS:FILE®. Now you can create and organise your records according to your own specifications! With PFS:FILE, you get an easy-to-use personal filing program that works like a paper filing system, but without the paper! You decide how your records are to appear by simply organising information on "forms" that you design right on your display screen. Form layouts can have as much or little structure as you wish. The advantage? Store, retrieve, and review information in a fraction of the time it would take with a conventional filing system. Once you've created the basic form, all you do is fill in the blanks. Enter data in any order that you like. Retrieval is not limited by the order in which the information is stored. And you can change the original form design without having to re-enter the data. PFS:FILE can be used in various applications: business, professional, home and education. 26-1518 179.95
PFS:REPORT. 26-1517 149.95

NEW! Target PlannerCalc®. Now you can get the versatility of higher-priced electronic spreadsheets for under \$100! PlannerCalc's easy-to-use design minimises the need for an extensive user's manual. Create your own financial models by entering and processing data by column, row or individual location. The program offers you a wide variety of mathematical operations, including conditional commands. And best of all, PlannerCalc is a spreadsheet program that uses plain English formulas instead of the more complex algebraic formulas. For example, an obscure equation like "A1 = 500" can be written as "LINE 1 WIDGETS = 500". And a "Help" screen that details an operation is available by simply pressing the question mark key. 26-1512 99.95

MORE PROGRAMS FOR MODEL 4

**Enhanced
VisiCalc®**

349⁹⁵

- A Multi-Purpose Program for Model 4
- View Countless "What If" Situations

NEW! This versatile management and engineering planning tool takes advantage of Model 4's 128K memory capacity and 80 x 24 display screen to handle large spreadsheet analysis problems. You simply define the formulas, enter the figures and VisiCalc performs all calculations automatically. Change any value or formula, and VisiCalc instantly updates every related number! You can view countless "what if..." situations in seconds. Enhancements include an entry editor to modify formulas and labels without re-entering them, and logical and relational operators to perform testing and branching. Optional printer allows printing of any portion of your worksheet. 26-1520 349.95

**Powerful Multiplan™
For Model 4**

269⁹⁵

**A "Second Generation"
Forecasting Program
That Makes
Spreadsheet Analysis
Easier Than Ever**

An incredible easy-to-use decision support tool. Multiplan lets you consolidate related worksheets so that information is transferred between them automatically. All prompts are full length words or phrases. Plain English names can be assigned to any column, cell or area. If you have any questions, an On-Line Reference Guide knows where you are in Multiplan and offers information related to your problem. With Multiplan, up to eight display windows can be created on the screen simultaneously. Sorting can be performed in alphabetical or numeric order. Vary individual column widths, center numbers and text within a column and align decimals. Format your own reports, too. Multiplan can also directly utilise your current VisiCalc files. Includes tutorial manual. 26-1530 269.95

SPECIFICATIONS. Microprocessor: 4 MHz Z-80A (2 MHz in Model III mode). Memory: 64K RAM, expandable to 128K. Provides for disk drive emulation in RAM, only 64K addressable from BASIC.
