

Tandy Introduces the DT-1: The Only Video Terminal Good Enough to be Called a TRS-80

Tandy's new TRS-80 DT-1 is a no compromise video terminal. It is ideally suited for communications with our new TRS-80 Model 16 Multi-User Office System or with other host computers. With a low-cost Tandy acoustic coupler it can also access time-sharing information networks.

State-of-the-Art Design. Unlike many terminals, you can easily set up and change the configuration of your DT-1 from the keyboard. There are no dip switches to bother with. The secret? A revolutionary non-volatile memory that retains your terminal configuration even with power off — and without a battery backup!

Multiple Emulation Modes. The DT-1 is completely code compatible with four standard terminal protocols. It can emulate a Televideo 910, a Lear Siegler ADM-5, ADDS 25 or Hazeltine 1410 terminal.

Full 80 x 24 Display. The 30.5 cm diagonal CRT displays 24 lines of 80 upper and lower case characters per line. Special single-character symbols are used to display control characters.

Dual-Speed Repeat. Any character can be repeated by merely holding down the desired key. After several characters are repeated, the DT-1 will automatically repeat the characters at a faster rate.

Two Printer Ports. The TRS-80 DT-1 can be equipped for hardcopy output by connecting a printer to the built-in RS-232C serial interface or parallel interface.

Special Features. A local monitor mode lets you enable printer ports and position the cursor using local control and escape modes. The carriage return key can be programmed with or without a line feed. Control key termination codes are also user programmable. An electronic bell is standard.

Only \$1,299 Each. The full featured TRS-80 DT-1 terminal is available at your nearby Tandy Computer Centre or from the expanded computer department of selected Tandy stores and dealers. See it today!

TRS-80 DT-1 Highlights

Data Transfer: Ten keyboard selected rates: 75, 110, 150, 300, 600, 1200, 2400, 4800, 9600, and 19200 baud.
