

Latest News!

May 1, 1987

This flyer contains information about new products, new versions, price changes and anything else that has happened since we printed our original catalog. The information presented here supercedes the catalog information.

NEW TOLL FREE NUMBER

We've got a new toll free 800 number! (The old number is no longer in service.) This single line is now good from anywhere in the US (including Alaska, Hawaii, the Virgin Islands and Puerto Rico) and all of Canada. The new number is:

1-800-628-2828 (Extension 918)

REMBRANDT

New LOWER PRICES: We've cut prices in half for all versions of REMBRANDT! The complete REMBRANDT package is now available for as little as \$39.95!

New Heath and Radio Shack versions: We are now shipping new versions of REMBRANDT for the Radio Shack Model 4 running either CP/M or TRSDOS and for the Heath/Zenith H-8/19/89/100 series of computers running CP/M.

New Combination Pricing: Since so many of our customers have two computers, we're now offering a special price of just \$59.95 when any two versions of REMBRANDT are ordered at the same time.

TWIST & SHOUT! renamed LONG & LOUD!

New Name: We've improved and updated the TWIST & SHOUT package and have renamed it LONG & LOUD!

New TRS-80 Model 4 TRSDOS Version: As well as supporting all MS/DOS, PC/DOS and CP/M machines, LONG & LOUD! is now available to run on the Radio Shack TRS-80 Model 4 using TRSDOS (as well as CP/M).

New features, New printers: We want LONG & LOUD to support every printer capable of dot graphics — or your money back. We've added lots of new printers to the list that is currently supported. So many, in fact, that we don't have space to list them here. In addition, if you buy LONG & LOUD and your printer isn't supported — we'll write a custom printer driver for you *at no charge* and we'll help you get it going or we'll give you your money back.

If we need to write a custom printer driver, we'll ask you to send us Xerox copies of a few pages in your printer's manual and we'll return a new disk to you within a couple of weeks. If we can't do it, we'll give you a complete refund.

LONG & LOUD! has a number of significant improvements over TWIST & SHOUT! including better screen handling, easier installation and much more printer support. LONG & LOUD now supports four type sizes in sideways printing mode and five type styles (Times, Sans Serif, Olde English, Script and Symbols) in the banner mode. All typefaces in the banner mode now support the entire ASCII character set including upper and lower case letters. The Symbol banner font includes a number of graphic symbols (like hearts, arrows and even the ever popular happy face) that you can use to spruce up your banners and posters.

PRESTO

New Version 3.0 released: A new version of PRESTO has been released which includes a number of significant improvements over earlier versions. First and most important, PRESTO now uses about 5K less memory than previous versions. Second, all standard CP/M functions are available from within PRESTO — copy, erase and rename files, perform directory operations and view files. Finally, you can throw away SmartKey and XtraKey since PRESTO now includes its own keyboard macro processor which lets you redefine the keyboard at any time.

New Epson, Morrow & Heath versions: Version 3.0 of PRESTO is available to run on a number of new CP/M computers including the Epson QX-10, all Morrow computers and Heath H-8/19/89/100 computers. When ordering Heath version, please specify hard or soft sector disks.

MEDIA MASTER

New disk formats (including 3.5"): The IBM versions of MEDIA MASTER, MEDIA MASTER Plus and ACCELERATE 8/16 now support a number of new disk formats including the new 3.5" diskettes on machines with these drives. The list of supported disk formats now tops 200 — here are the new formats:

40 track formats: Adam CP/M SSDD, ATR 8000 DSDD, Avatar TC10, BM 400K DSDD, Bondwell DSDD, British Mini 801 DSDD, Cal Comp Sys 5 sec. SSDD and 18 sec SSDD, Columbia 1502 SSDD, Compugraphic CP/M SSDD, GMR DSDD, Hector HRX SSDD, Lexowriter Series III, Lynx SSDD, Memotech DSDD, Micromint SB180 DSDD, NewBrain SSDD and DSDD, Olivetti ETC 300 SSDD, Osborne G2 DSDD, Panasonic KX-E828 DSDD, Quay CP/M DSDD, Sanco F102 DSDD, Sanyo 1100 CP/M DSDD, DS-DOS 10 sec SSDD, DS-DOS 10 sec DSDD, Spectravideo SSDD, Star-Lite HD20 SSDD, STD Development DSDD, TIKI 100 SSDD, TRS-80 Model 4 Montezuma Micro CP/M 1.2 and 2.2, Total Access CP/M 512 and 1024, Wang OIS CP/M DSDD, Alliance CP/M DSDD.

80 track formats: Ampro Little Board DSDD, BBC Torch DSDD, BM 1.3 Meg DSDD, Canon AS100 DSDD, Columbia 1500 SSDD, CompuTek Pub. 4 DSDD, Concurrent DOS DSDD, Heath/Zenith Z90 Z-37 SSDD, Z-37 DSDD, CDR Ext. DSDD, Magnolia DSDD, Z100 DOS 8 and 9 sector, ICL DRS 100 DSDD, Kaypro DSDD, Memotech FDX DSDD, Osborne G2 DSDD, Seiko CP/M DSDD, Sperry UTS-30 DSDD, Super Beacon 4 DSDD, Tatum 2000 DSDD, TI Professional DSDD, Visual 1050 SSDD, Wavemate Bullet DSDD.

3.5" formats: Apricot SSDD and DSDD, BM 800K DSDD, HP 150 DSDD, IBM 730k DSDD.

New Z80 support: MEDIA MASTER Plus and ACCELERATE 8/16 now support Z80 (as well as 8080) codes — this means that you can now run many more CP/M programs than ever before (including Turbo Pascal programs). The prices remain unchanged.

NEW PRODUCTS

On the pages that follow you'll find descriptions of some new products that we've brought on board, including: **Milestone** (a business project planning program for all CP/M and MS/DOS machines), **Backup Master** (simply the best hard disk backup program available for IBM and compatible computers) and **Code Blue** (IBM compatibility enhancement software for DEC Rainbow computers).

AMERICAN EXPRESS

Now accepted: We can now accept your American Express card (as well as Visa and MasterCard) as payment for your software order.

ORDER BLANK

Please use the new order blank (enclosed) for all orders.

MILESTONE

Automatic Business Project Planner

Originally \$295
Now only...
\$99.95

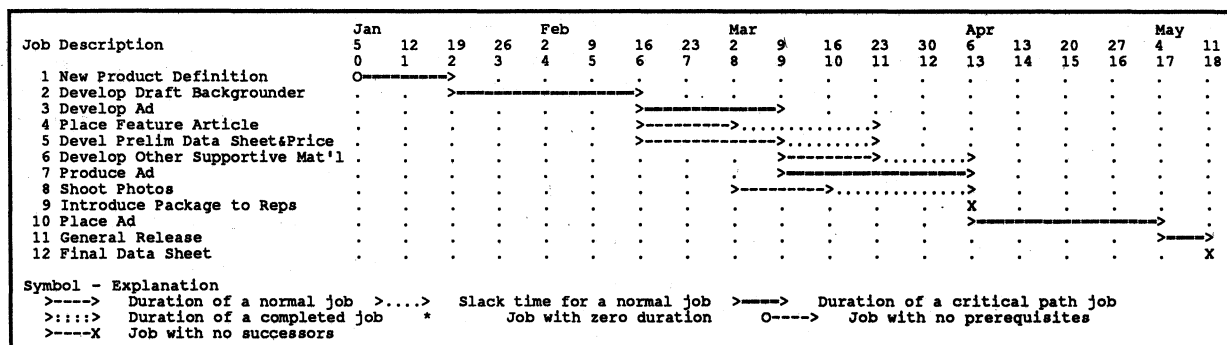

Never blow another deadline! Whether you're opening a branch office, hiring a sales force or launching a new product, nothing boosts the bottom line like being on time and within budget.

Yet that kind of careful planning can take up a lot of your valuable time. Milestone brings all of the sure-fire planning methods of Critical Path Management together in one easy-to-use package for your personal computer.

Here's how it works: You divide your major project into a number of smaller tasks. At Milestone's prompts you enter the manpower, cost and time estimates for each activity and indicate which tasks must be completed before others can start. Then Milestone does the rest, working out your entire schedule and budget (with holidays, sick days and even lunch hours taken into account).

Milestone generates four extremely useful reports. First, the **Project Description Report** summarizes your overall project including total costs, manpower requirements (by skill type and time) and start-to-finish schedules. Next comes the **Job Description Report** which details individual tasks by duration, manpower costs and prerequisite tasks. The **Columnar Job Report** summarizes any two or more elements of your project's job description data — you can customize this report to show only the information you need to control the project.

Finally, Milestone's clear and concise **Time Schedule Report** (as shown below) gives you a week-by-week chart showing detailed start and completion dates for each task, critical deadlines, manpower requirements and costs. (The Time Schedule report looks even better when printed sideways with TWIST & SHOUT — see our special offer below.)

Milestone is interactive — it works a lot like a spreadsheet — every time you add a new task or make a change to an existing one, the entire schedule is recomputed and the new critical path is immediately displayed. Manpower and cost summaries can be displayed at the bottom of the screen, so that you are constantly aware of how schedule changes affect your budget. Milestone's immediate feedback permits you to do cost-time tradeoffs — interactively!

Milestone is the perfect tool for almost any project from developing a business proposal to planning a political campaign to building a house! On a standard 64K CP/M machine, Milestone can easily handle projects with nearly 200 separate tasks, even more are possible on MS/DOS machines.

Milestone was highly rated by **INFOWORLD Magazine** (Excellent Performance, Excellent Ease-of-Use, Excellent Error Handling and Good Documentation), who said, "Considering the complexity of the subject, it [Milestone] is convenient and easy-to-use. This is the result of a well-thought-out, menu driven program."

Milestone is available for any CP/M, MS/DOS or PC/DOS computer and any printer. Please specify operating system and computer type when ordering. If you have a full IBM compatible computer, order the PC/DOS version. If you have a non-compatible MS/DOS machine (like the Sanyo 555, DEC Rainbow or Zenith Z-100) then order the generic MS/DOS version. The CP/M version is stocked in Osborne, Kaypro, Heath and Morrow disk formats. Add \$5 disk transfer fee for other CP/M disk formats.

Special Offer: Order MILESTONE and TWIST & SHOUT at the same time for just \$124.90 — you save \$10!

Credit card, COD orders, call 24 hours toll free: 800-628-2828 (Extension 918)

BACKUP MASTER

High Performance Hard Disk Backup Utility

You love your hard disk but... if it ever fails, the loss of programs and data could be a major disaster for you. Your hard disk is one of the most valuable additions you ever made to your computer system and you constantly depend on it to safely store your valuable data.

The only problem is that, being a mechanical device, your hard disk can fail on you at any time. *PC Week* magazine reported that most hard disks fail in their second year of use! And if you're not prepared, that failure can be devastating.

We all know that the way to avoid being caught by a 'crashed' disk is to perform backups of your hard disk on a regular basis — that is, copy the contents of the hard disk to another storage device so that the data won't be lost in a hard disk disaster.

We all know that's what we're supposed to do, but we don't perform the backup often enough. Why? Because backing up a hard disk is a *pain in the neck* and it takes forever.

If you had a better, faster and easier way to back up your hard disk, you'd do it more often and your important programs and data would be protected!

At \$89.95, Backup Master is the cheapest insurance you can buy! Simply stated, Backup Master is the best hard disk backup program on the market today. It's so easy-to-use, and so fast that, with the drudgery gone, you'll use it more often and you'll be safer.

Backup Master works with the hardware you already own — it'll back up your hard disk on floppy disks, another hard disk or even on a cartridge drive. You can back up a full 10 Megabytes to floppy disks on a regular IBM PC in less than 8 minutes (about 4 minutes on an AT). It's so fast that it can actually outperform tape backup systems costing twenty times more! For IBM PC, XT, AT and compatibles.

Backup Master is *not* copy protected. Backup Master is available now at the low price of just...

\$89.95

Code Blue

*IBM PC Compatibility
Software for the
DEC Rainbow 100*

CODE BLUE is a powerful MS/DOS program for the DEC Rainbow 100. It's designed to quickly transform the Rainbow's operating system to make it behave like IBM's PC-DOS, so for the first time your Rainbow can run previously incompatible IBM PC non-graphics programs. With CODE BLUE your potential software library is vastly expanded — choose from previously unavailable software titles. If it's a non-graphics program and it runs on an IBM PC or compatible, it is now likely to run on your Rainbow with CODE BLUE — and you don't have to sacrifice Rainbow compatibility. You continue to get your money's worth from your Rainbow hardware while running many popular IBM PC compatible programs.

At only \$99.95, CODE BLUE is the most inexpensive way to add IBM PC compatibility to your Rainbow. And since CODE BLUE is just software, you don't have to worry about problems with warranties, installation, maintenance agreements or incompatible hardware add-ons. CODE BLUE offers a near complete emulation of the IBM keyboard (it even includes a keyboard template for your Rainbow) and it emulates all non-graphics aspects of the IBM video system. A partial list of compatible programs follows.

The IBM versions of the following programs have been successfully run with CODE BLUE on a 256K Rainbow system: dBase II, FileMate, the Norton Utilities, PC-Calc, PC-Disk, SuperZap, XTREE and ZP/EM. With more than 768K in your Rainbow, the following programs (and more) will also run under CODE BLUE: DSBakup, Multimate, RBASE: 5000, Turbo Pascal, WordPerfect, Multiplan, dBase III Plus, SPT Accounting, Managing Your Money, PC Outline, Smartkey and Thinktank!
