RS232C Communication Software

Cat. No. 26-1146

Suggested Retail Price (may vary at individual stores and dealers) \$29.95

Description

The RS232C Communications Software was written for TRS-80 to TRS-80 communications by telephone. You can use it to send important business data to a branch office across the country, or simply send a program to a friend across town. "Compac" allows you to transmit a program or data from cassette, disk or memory to another TRS-80. The "host" program will let your TRS-80 serve as "host" to another TRS-80 running the "term" program. Both keyboards are active and, except for graphic characters, both video displays are identical. The operator using "term" can run the "host" computer as if he was sitting at the host's keyboard.

Format

Binder contains seven programs on four cassettes and extensive manual. All programs can be transferred to disk and will support disk operations.

Hardware Required

- Level II, 16K TRS-80
 - Expansion Interface (26-1140, 26-1141, or 26-1142)
 - RS232C Communications Board (26-1145)
 - Telephone Interface I (26-1170)
or
 - Telephone Interface II (26-1171)
- (At least one of the two communicating TRS-80's must have a 26-1171 or another "orig/ans" telephone interface.)

Communications Functions

Host: Allows TRS-80 to act as the 'Called' system
Term: Allows operation of the host computer from the "term" keyboard.
Compac: Transfer of basic program
Transfer of memory block
Read and transmit data tape
Read and transmit disk files
Receive and save cassette program or data file
Receive and save disk program or data file
