Scripsit™ Word Processor

Suggested Retail Price (may vary at individual stores and dealers)

For Tape System, 26-1505, \$69.95

For Disk System, 26-1563, \$99.95

Description

The TRS-80 Word Processor (SCRIPSIT™) is a powerful full-featured system designed to allow you full editing and formatting capabilities. The system includes Global Replace, Delete and Find capabilities. SCRIPSIT utilizes a unique audio tape teaching system to familiarize you with the features of the program. You simply listen to the tape, and follow directions. We have provided sample material which, when used with the tapes, will demonstrate the many features of SCRIPSIT.

Format

The Disk package comes in a deluxe three-ring binder with one program diskette, blank data diskette and manual. The Tape package comes in a binder with program tape, blank data tape and manual. Both packages include a pocket size Quick Reference Card and an audio tape instruction system (including 3 audio cassettes) to familiarize you with SCRIPSIT.

Minimum Hardware Required

- 16K Level II TRS-80 Computer System
- Printer such as our Line Printer II or our new WP-50 Daisy Wheel Printer
- Appropriate Printer Cable
- Optional Upper/Lower Case Kit

Minimum Additional Equipment for Disk System

- 16K Expansion Interface
- One Model I TRS-80 Disk Drive

Detailed Description

The TRS-80 SCRIPSIT Word Processor defines a special "control" key on the keyboard. The control key is used in conjunction with 14 regular keys to let you move words or paragraphs, insert, delete and edit to your hearts content! We provide press-on labels which aid you in identifying the special keys. The SCRIPSIT software lets you compose letters and documents of all types on TRS-80's screen using upper case, or upper and lower case with the new Upper/Lower Case Kit. Document chaining allows you to load more than one document into the TRS-80 at one time for merging, inserting and other operations. SCRIPSIT gives you automatic page numbers, page headings and footnotes and makes it easy to indent paragraphs, change line widths, and center your text horizontally or vertically. Ongoing reports, form letters and text with print formats can be stored on TRS-80 cassettes or diskettes for use or revision at any time. If you have a multiple page document which you would like printed on individual sheets of paper, such as your company letterhead, SCRIPSIT provides single sheet printing capability. In this mode, SCRIPSIT will print one page then wait till you are ready to print the next page, then continue in this manner until all pages have been printed. In addition, the Disk version can be used to create and edit BASIC programs stored in ASCII format.

Radio Shack

A DIVISION OF TANDY CORPORATION • FORT WORTH, TEXAS 76102

- SCRIPSIT can be used to create or modify Disk BASIC programs stored with the ASCII option
- Chain text together to create new documents from existing ones
- All parameters can be changed inside your text, giving you complete control over printed material at all times.

Scriptit™ Takes the Drudgery Out of Typing

This is a reproduction of an actual SCRIPSIT printout

Radio Shack's new word processor takes care of all formatting and correction problems, while you concentrate only on your thoughts.

With SCRIPSIT you don't have to listen for the little bell at the end of each line. When you run out of room on a line, SCRIPSIT doesn't complain. It simply moves the word you were typing down to the next line, while you keep typing. SCRIPSIT won't lose a single keystroke while it does it!

SCRIPSIT always shows you exactly where you are, even if the display can't show the full line. You will always see a "window" where you're working, and SCRIPSIT will move the window wherever you need it.

Paragraphs and pages are automatic, too. Need tab stops? No problem! SCRIPSIT handles that, too. Need to center a title? Nothing could be easier! For example:

This is centered.

Do you need a special line at the top of each page? Do you need a special line at the bottom of each page? Want them only on odd-numbered pages (or even-numbered, or all)? SCRIPSIT can do it!

SCRIPSIT is very obliging about page numbers, too. It will do them automatically--all you have to do is ask.

SCRIPSIT will print out your letters (or the Great American Novel!) with nice, even margins. It will start a new page whenever you run out of room, and you'll never have to insert and align a sheet of typing paper.

If you find a typo, it's easy to fix. If you have two paragraphs out of order, you can exchange them with only one command. Did you misspell a word? You can fix it with SCRIPSIT. Did you misspell it in seventy-nine different places (you can count them, too!)? SCRIPSIT will fix all of them while you watch.

Do you want five copies of your college term paper? Tell SCRIPSIT--five copies or two hundred are just as easy as one.

Hyphenation? Of course! Just tell SCRIPSIT. And relax.

Does it sound complicated to use? It isn't. It's less trouble than changing ribbons, inserting new sheets of paper, erasing mistakes, etc. SCRIPSIT comes with a teaching course on cassette that will help you make the most effective use of it with the least effort.

This may sound like a futuristic dream. But it's not! SCRIPSIT is available today for the TRS-80, only from Radio Shack.
