FOR IMMEDIATE RELEASE

WORDSTAR for the TRS-80 and MAX-80

The most widely used word processing system in the world, WordStar by MicroPro, is now available. Until now, using WordStar meant running under CP/M, or another similar operating system. LOGICAL SYSTEMS, INC. is proud to announce the release of WordStar on SmaL-LDOS. This brings WordStar to the TRS-80 family of computers, without CP/M or hardware modifications. All WordStar features (except background printing) are available. In addition, MicroPro's MailMerge can be added to produce a text processing system unequaled in the microcomputer world. For instance, document size is limited only by your available disk space. Text formatting and justification is shown ON THE SCREEN, and there are adjustable levels of on-screen "help". WordStar deserves its high reputation as the ultimate microcomputer word processor.

REQUIRED HARDWARE AND SPECIFICATIONS:

WordStar comes on the SmaL-LDOS operating system for the following microcomputers:

Radio Shack TRS-80 Models 1, 3, and 4 (in the Model 3 mode); Lobo Systems MAX-80 (MAX-80 LDOS required). At least two double-density disk drives are required. WordStar introductory price is \$249.00 plus \$5.00 S&H. MailMerge introductory price is \$149.00 plus \$4.00 S&H. The introductory prices will be in effect until December 31, 1983. For additional information, a free LSI Catalog, or ordering, contact: Logical Systems, Inc. / 8970 N. 55th Street / P.O. Box 23956 / Milwaukee, WI 53223 / 414-355-5454.
