

Only One More Issue Remains On Your  
TRS-80 Microcomputer News Subscription!

Your Microcomputer News renewal hasn't been received . . .

. . . and that's important to our Microcomputer News staff because we want to continue your subscription uninterrupted.

Since its four-page beginning in 1977, your Microcomputer News has grown to a forty-eight page format with a color cover thanks to our readers' interest and requests for more TRS-80 information.

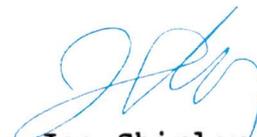

Frankly, we're excited about this growth and we want you to continue to share in it.

So much so that even though the per-issue price has been increased to \$1.50 or a total of \$18.00 a year, you can continue your subscription at the rate of \$12.00 and save 33%!

However, we must have your check or money order back with the enclosed order form within ten days to make sure that your name remains on our mailing list.

If you have already mailed in your renewal from our first letter, then don't worry as our letters are probably just crossing paths in the mail . . . but, if you haven't renewed yet, then let me urge you to drop your renewal in the mail today to ensure its arrival before the ten-day deadline.

Thank you!

Jon Shirley
