TRS-80 MICROCOMPUTER SYSTEM

Standard Numeric Pad Option

**Cat. No. 26-1103
(included in 26-1053/1003,
26-1056/1006 and 26-1101)**

Your TRS-80 Computer incorporates a helpful business-oriented, 12-key numeric pad. This will help you enter numbers faster than with the normal typewriter number keys. Most business machine operators have been trained on a standard "10-key" calculator keyboard; with the addition of this feature, you'll gain advantage of this training.

Note that the 12-key pad is connected "in parallel" with the typewriter keys. Thus, if you press SHIFT and one of the numbers or the decimal point keys at the right, you'll be keying in a shift-symbol. For example, pressing SHIFT 1 will produce a ! (not the number 1); so take care not to produce errors in inputting numbers.

The addition of this standard numeric pad will greatly speed input of number-oriented programs (payroll, math, inventory, finance, etc.).
