CUSTOMER SERVICE BULLETIN

NO.

0316-99

Description TRSDOS 6Model 4Stock No. 260-0316Date JAN 20, 1986

Our records indicate that you have recently received a Customer Service Bulletin concerning the upgrade procedure to TRSDOS 06.02.01. We show that you were registered with us prior to the December 31 deadline, but because of unfortunate mailing delays, you were not notified of the upgrade in time to take advantage of the special price offer. Therefore, for your convenience, the time limit for requesting the upgrade(s) has been extended until February 28, 1986.

Support for earlier versions of TRSDOS 6 will continue until February 28, 1986. Starting March 1, 1986, the TRSDOS 06.02.01 Operating System will be the only Model 4 TRSDOS Operating System supported by Radio Shack personnel.

As previously stated in Customer Service Bulletin number 0316-04, if you are presently using a version of TRSDOS earlier than 06.02.00, you must first acquire Version 06.02.00 by ordering stock number 260-0316. To complete the upgrade to TRSDOS 06.02.01, you will need to apply the PATCHES available on stock number 700-2298. To make arrangements for these items to be ordered for you, contact your local Radio Shack Computer Center, Radio Shack Plus Computer Center, or Participating Radio Shack Dealer.
