Problem

General Ledger with the Line Printer VIa and L.P.C. Driver is not printing properly when the user has quite a few transactions in one session.

Solution

The problem is corrected by following the steps listed below.

1. Backup the diskette(s) and make the changes on the Backup copy of the program.
2. In BASIC load the program by typing LOAD "GLTXPOST"
3. Make the following corrections:

CHANGES (Retype the line or refer to the Edit section of the owners manual)

Old Line: 50000 N=N+1:L=0

New Line: 50000 N=N+1:L=12

4. Type SAVE "GLTXPOST" to save the changes in the program.
5. At TRSDOS Ready, make a backup copy of the corrected diskette.
