Description	Disk Scretsit
Model	Model I
Stock No.	26-1563 Version 1.0
Date	October 7, 1980
Page 1 of	1

Problem

In Disk Scretsit the program will show on the video a character, but when it is printed out the letter is dropped.

Solution

This happens because the characters have the 7th bit set when it should not be. This can occur when blocks are set and removed improperly. To fix, delete the character and then insert it back into its proper position.
