Problem

When repaginating a document with multiple headers or footers, repaginate would sometimes de-center centered lines and reformat paragraphs even when it was not asked to reformat and when the paragraphs were locked.

Solution

To prevent this from happening, apply the following patches at TRSDOS READY.

*NOTE: The data at the bottom of the STARTUP screen must be 05/20/1982 before you apply these patches; if it is not, obtain and apply all previous patches.
