1. INITIALIZING THE PC-2 POCKET COMPUTER

Here is the correct power up procedure.

To properly initialize your new PC-2 for operation after inserting/replacing the batteries or after pressing ALL RESET, follow this procedure:

1. After inserting the batteries and turning the unit over, the Display should read: NEWØ:CHECK?
2. At this point press <CLEAR>.
3. Be sure you are in PROgram Mode. If not, press <MODE> until PRO is displayed.
4. Type: NEWØ <ENTER>
5. Press <SHIFT> <MODE>. The PC-2 will then be in RESERVE Mode.
6. Type: NEW <ENTER>

This procedure will clear the PC-2's Main and Auxiliary memory areas.

It may be necessary for you to perform these operations whenever you change batteries again or press ALL RESET.

2. PROFILE III PLUS 26-1592

Manual makes reference to interfacing with VisiCalc (26-1569). Please be aware that current version of VisiCalc is on 1.2 TRSDOS and is NOT to be used with Profile III Plus. An updated version of VisiCalc on TRSDOS 1.3 will be available within 2 weeks.

Customers original (26-1569) VisiCalc is to be forwarded to this department with covering memo and will be redumped free of charge.
